$\Gamma_I$: the 560 edges at $(0, 0)$
20 in its ring, 540 to others

$\Gamma_I$: a non-adjacent pair,
$\mu = 240$ common neighbors

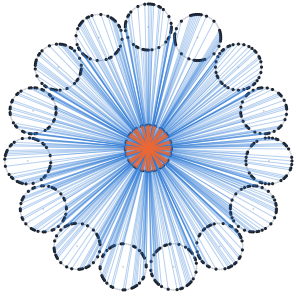

zoom into $R_0$: the Brouwer–Haemers
graph $\mathrm{srg}(81, 20, 1, 6)$

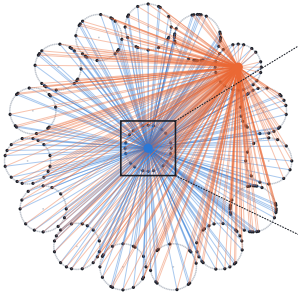

inner: $\lambda = 1$ (triangles), outer: $\mu = 6$

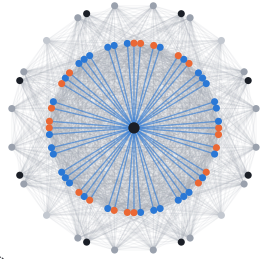

$\Gamma_{II}$: the 592 edges at $(0, 0)$
52 in its ring, 540 to others

$\Gamma_{II}$: a non-adjacent pair,
$\mu = 272$ common neighbors

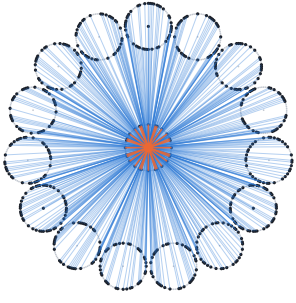

zoom into $R_0$: 52-regular,
not strongly regular

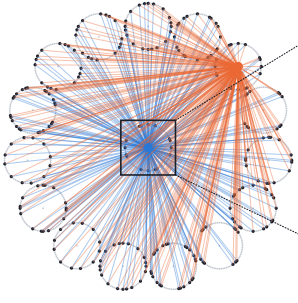

inner: 31 / 37, outer: 26 / 32 / 38

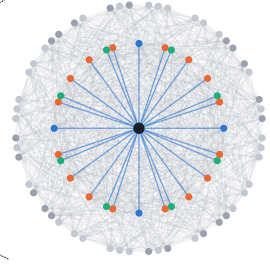

$\Gamma_{III}$: the 595 edges at $(0, 0)$
28 in its ring, 567 to others

$\Gamma_{III}$: a non-adjacent pair,
$\mu = 272$ common neighbors

zoom into $R_0$: 28-regular,
not strongly regular

inner: 1 / 7 / 13, outer: 8 / 14
