Γ_I: the 560 edges at $(0, 0)$
20 in its ring, 540 to others

Γ_I: a non-adjacent pair,
$\mu = 240$ common neighbours

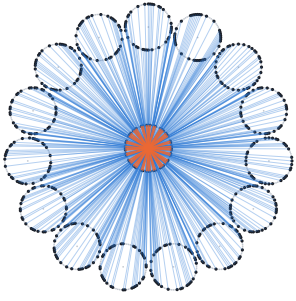

zoom into R_0: the Brouwer–Haemers
graph $\mathrm{srg}(81, 20, 1, 6)$

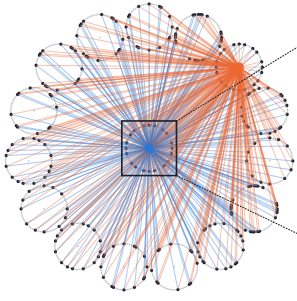

inner: $\lambda = 1$ (triangles), outer: $\mu = 6$

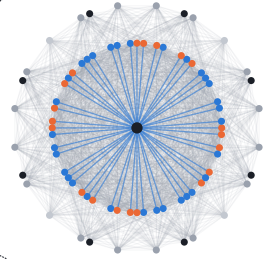

Γ_{II}: the 592 edges at $(0, 0)$
52 in its ring, 540 to others

Γ_{II}: a non-adjacent pair,
$\mu = 272$ common neighbours

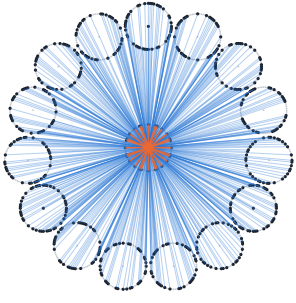

zoom into R_0: 52-regular,
not strongly regular

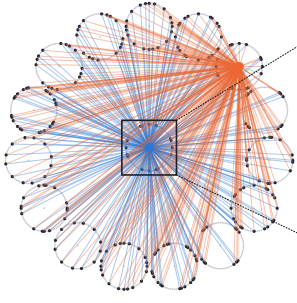

inner: 31 / 37, outer: 26 / 32 / 38

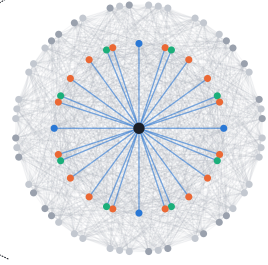

Γ_{III}: the 595 edges at $(0, 0)$
28 in its ring, 567 to others

Γ_{III}: a non-adjacent pair,
$\mu = 272$ common neighbours

zoom into R_0: 28-regular,
not strongly regular

inner: 1 / 7 / 13, outer: 8 / 14
